## U.S. Probation Officer Action:

Mr. Jackson was released from custody on February 27, 2008, following his detention on a violation of supervised release. On February 29, 2008, Jackson tested positive for cocaine and admitted to marijuana and cocaine usage. On March 1, 2008, the offender sought assistance for his drug problem at the Lourdes Hospital emergency room ; however, he was not admitted to the hospital. Jackson was referred for out-patient counseling.

Jackson is simultaneously serving a term of New Jersey State Parole. His parole officer was consulted regarding the positive urine specimens and on March 13, 2008, parole placed the offender in an in-patient treatment facility, specifically Kintock Group, Bridgeton, New Jersey. The estimated length of stay is 90 to 120 days.

The offender's most recent acts of non-compliance are limited to substance abuse. The probation officer posits the in-patient facility will address this substance abuse problem. Upon release, the offender will continue to be monitored closely for drug use and will be placed on home confinement as originally ordered by the Court on February 27, 2008.

 Respectfully submitted,
